

Co-Founders Pitch Video – Privacy and how to upload

How we will host your video

Your video will be uploaded to a private youtube channel, and be made “unlisted” – making it unfindable to the general public, it won’t show up on search engines and it won’t be findable on youtube. It will only be accessible to someone with a direct link to the video.

This playlist will be shared with the full cohort for the purposes of team formation. And then removed entirely from the platform.

Prior to joining Co-Founders, you will all be signing an NDA. As such, while the links will be shared with you in a playlist to view the content, **redistribution of any video materials without the creator’s consent would be in violation of your NDA**. So, we ask that any YouTube content is used purely for team formation.

If you have any questions or concerns regarding this, please direct them to the Co-Founders team.

How to shoot your pitch video

There is no set style or format we prefer, so feel free to utilise whatever method is easiest for you.

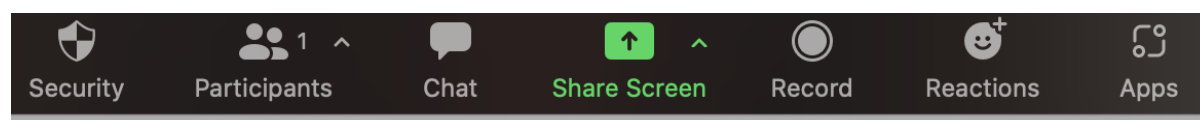

Videoeing on your phone is certainly an option. Perhaps a method that goes overlooked is to use Zoom.

Simply jump into your own zoom room by pressing new meeting on the Zoom app.

New Meeting ▾

Press record.

When you’re finished pitching press stop recording.

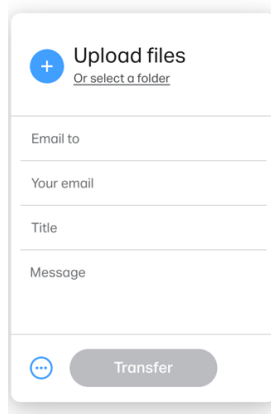

When you end the meeting you can choose to download the recording. Then simply send it to us!

Again, this is only a suggested method for those who don't have a DSLR camera for example, or another means of producing video.

How to send us your video

Video files can be a bit of a pain to send, so below are a few options to send them across so you can avoid any headaches

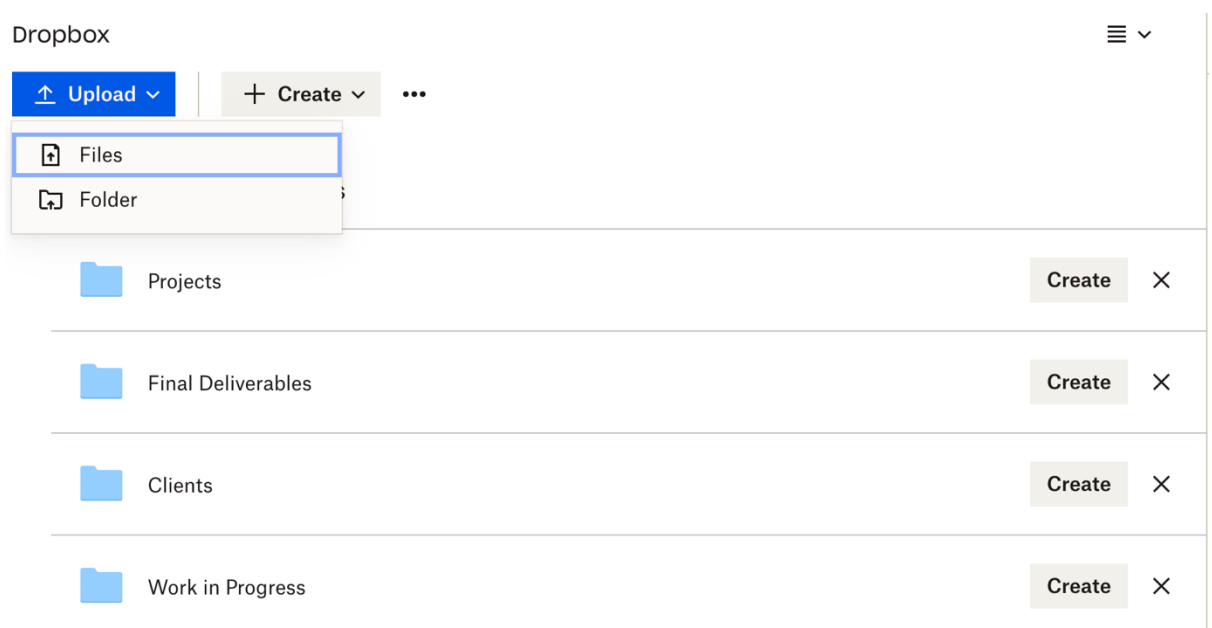

1. <https://wettransfer.com/>

A screenshot of the Wettransfer.com upload interface. It features a blue circular icon with a white plus sign and the text 'Upload files' and 'Or select a folder'. Below this are input fields for 'Email to', 'Your email', 'Title', and 'Message'. At the bottom is a grey 'Transfer' button and a blue circular icon with three dots.

Simply fill out the info fields and hit 'transfer'. We transfer should allow transfer of up to 2GB file size as a free user- which is more than enough for 60 seconds of video.

2. <https://www.dropbox.com/login>

Create an account or sign-in if you have one already
Click "Upload -> files"

A screenshot of the Dropbox web interface. At the top, it says 'Dropbox' and has a menu icon. Below this are two buttons: 'Upload' (with an upward arrow icon) and 'Create' (with a plus icon). The 'Upload' button is selected, and a dropdown menu is open showing 'Files' (with a file icon) and 'Folder' (with a folder icon). Below the dropdown is a table with four rows, each representing a folder: 'Projects', 'Final Deliverables', 'Clients', and 'Work in Progress'. Each row has a blue folder icon, the folder name, a 'Create' button, and an 'X' icon.

Select and upload your video file.

Once you've uploaded, hover over the file, and click the 3 dots at the side
