

Titanic Quarter Queens Road Belfast

Situated in the heart of the city, Catalyst, Titanic Quarter is a space designed to promote innovation, collaboration and networking for the entire Catalyst community.

Catalyst

Our Workspaces

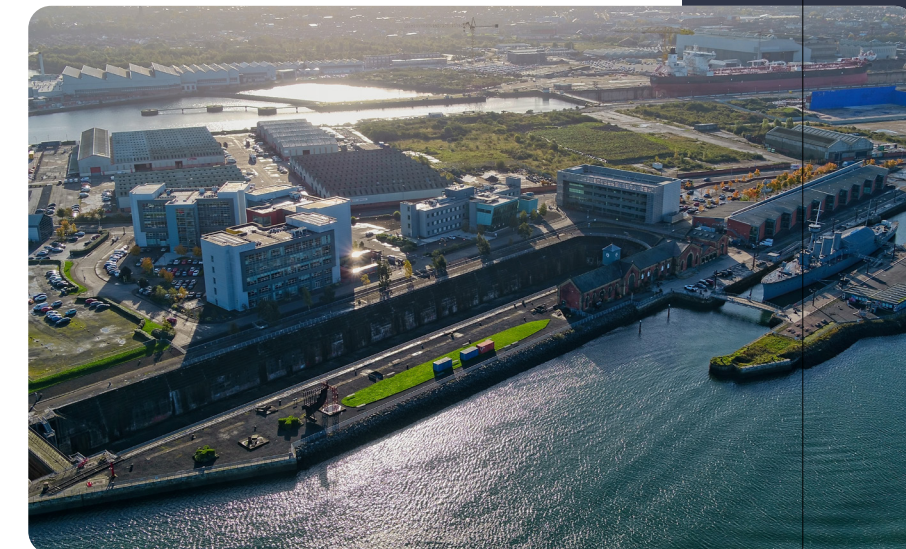

Catalyst is more than bricks and mortar. Our state-of-the-art, agile environments, unlike anywhere else in Europe, are infused with energy, creativity and endless possibilities that allows amazing minds to come together to do amazing things.

From single desks to full floor offices, we work with companies, start-ups and multi-nationals who want to make their mark on the world.

Titanic Quarter

Our dynamic workspace environments inspire active collaboration, entrepreneurship and connection. Our property-as-a-service offerings are designed to help individuals flourish and companies thrive.

You need room to grow. Our Titanic Quarter campus provides agile workspace that can support this which includes The Innovation Centre, White Star House, ECIT, The Legacy Building and Concourse Buildings.

The Innovation Centre

The central hub of the Catalyst community at our headquarters in Belfast. The Innovation Centre caters for individuals with virtual tenancies, one-person businesses, start-ups, and larger companies requiring an entire office. With the main café, lounge and meeting rooms on-site, this space is designed to promote collaboration and networking for the entire Titanic Quarter campus.

White Star House

The building is a landmark, with three prominent 'bows' on its front façade, equal in height to the three infamous ships built a few metres away by the White Star Line: Olympic, Britannic and of course, Titanic.

Concourse I / Concourse II / Concourse III / The Legacy Building

Agile, serviced workspace solutions starting from a dedicated individual desk facility, all the way to entire floors for large companies. On-site services include catering facilities, bookable meeting rooms and conferencing facilities, free car-parking and public transport services to the City Centre.

Momentum One Zero

The successful Science Park model was designed to integrate the three arms of the Knowledge Economy: industry, academia and government.

As part of Catalyst's ongoing relationship with Northern Ireland's research institutions, the ECIT building provides a state-of-the-art home for two of Queen's University's world-leading research bodies: ECIT, the Institute of Electronics, Communications and Information Technology; and CSIT, the Centre for Secure Information Technologies – The UK's Innovation and Knowledge Centre for cyber security research.
